

8 CAREGIVING BENEFITS

WELLBEYOND CARE

for Veterans and their Families

1- Vets Choose the Caregiver

We give Vets a list of the most compatible caregivers to their care needs, and can match Vets with Vets. We then show them (or their administrator) how to walk through the steps of screening, interviewing and hiring a caregiver.

2- Money & VA Benefits

Typically, Veterans using Well Beyond Care save \$10K to \$30K a year in caregiving costs in comparison to private duty agencies. We also make sure that Vets are aware of the 'Veteran Aid & Attendance' benefit for caregiving

3- Jobs for Veterans

We have Vets who continue to serve through caregiving. Vets on our system make 25% to 40% more money than if they worked for a private duty agency, and they get to choose whom they want to work for, including another Vet.

4- Payroll & Billing Hands Free

Families have enough to worry about and keeping track of time cards, clocking in and paying caregivers should not be one of those worries. We take care of all the back office items needed for payroll including reimbursement to the VA.

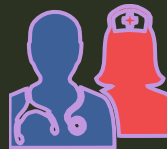

5- Health Care Navigator

Every Vet has access to a nurse navigator who is experienced with geriatric care to help them find and keep safe, reliable, affordable care in their home, and transitional care within their community; and access to local resources.

6- Care Plan / Scheduling

Our system provides the tools that help Veterans plan care and allow them to safely "age in place." In addition to scheduling, we offer daily reminders (with sign off) of the care plan to your caregiver to ensure proper care is given.

7- Healthcare Team Alerts

The Well Beyond Care system allows a caregiver to alert a Vet's health care providers via email in case of a significant change in status or health, preventing avoidable emergent events or needless emergency room visits.

8- Family & Friends Oversight

Our unique care-circle system allows extended family members to stay informed on the care that is being performed. With our internal messaging, family and friends can communicate with the caregiver and their nurse navigator.
